|  | Year 3 | Year 4 | Year 5 | Year 6 |
| :---: | :---: | :---: | :---: | :---: |
| Place Value | count from 0 in multiples of $4,8,50$ and 100 ; find or 100 more or less than a given number recoognise the place value of each dig digit number (hundreds, tens, ones) <br> - compare and order numbers up to 1000 <br> - identify, represent and estimate numbers using <br> - read and write numbers up to 1000 in numerals <br> and in words <br> - Solve number problems and practical problems involving these ideas. | - count in multiples of 6, 7, 9, 25 and $1000 \square$ find 1000 more or less than a given number $\square$ count backwards through zero to include negative numbers <br> - recognise the place value of each digit in a fourdigit number (thousands, hundreds, tens, and ones) <br> - order and compare numbers beyond 1000 <br> - identify, represent and estimate numbers using different representations <br> - round any number to the nearest 10,100 or 1000 solve number and practical problems that involve all of the above and with increasingly numbers <br> - read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value. | - read, write, order and compare numbers to at digit <br> - count forwards or backwards in steps of powers <br> - of 10 for any given number up to 1000000 <br> interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through <br> - round any number up to 1000000 to the nearest <br> - round any number up and 100000 <br> - solve number problems and practical problems <br> - that involve all of the above <br> - read Roman numerals to 1000 (M) and recognise years written in Roman numerals. | - read, write, order and compare numbers up to $10,000,000$ and determine the value of each digit <br> - round any whole number to a required degree of accuracy <br> - use negative numbers in context, and calculate intervals across 0 <br> - solve number and practical problems that involve all of the above |
| Addition and subtraction | - add and subtract numbers mentally, including <br> a three-digit number and ones <br> a three-digit number and tens <br> a three-digit number and hundreds <br> - add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction <br> - estimate the answer to a calculation and use <br> - inverse operations to check answers <br> - solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. | - add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate <br> - estimate and use inverse operations to check answers to a calculation <br> - solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why. | - add and subtract whole numbers with more methods (columnar addition and subtraction) <br> - add and subtract numbers mentally with increasingly large numbers <br> - use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy <br> - solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why. | - multiply multididigit numbers up to 4 digits by a method of long multiplication <br> - divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context <br> - divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context <br> - perform mental calculations, including with |
| Multiplication and division | - Recall and use multiplication and division facts for the 3,4 and 8 times tables <br> - Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods <br> - Solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems | - recall multiplication and division facts for use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1 ; dividing by 1 ; multiplying together three numbers <br> - recognise and use factor pairs and <br> - multiply two-digit and three-digit numbers by a one-digit number using formal written layout <br> - solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as $n$ objects are connected to $m$ objects. | - Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers <br> - Know and use the vocabulary of prime numbers, <br> - prime factors and composite numbers <br> Establish whether a number up to 100 is a prime and recall prime numbers up to 19 <br> - Recognise and use square numbers and cube numbers and the notation for these <br> - Multiply numbers up to 4 digits by a one or two digit number using a formal written method, <br> - Multiply and divide numbers mentally drawing upon known facts <br> - Divide numbers up to 4 digits by a one digit number using the formal written method of short division and interpret remainders appropriately for the context <br> - Multiply and divide whole numbers by 10,100 and 1000 <br> - recognise and use square numbers and cube numbers, and the notation for squared and cubed <br> - solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes <br> - Solve problems invoviving addition, subtraction, these <br> - solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates. | - identify common factors, common multiples and prime numbers <br> - use their knowledge of the order of operations to carry out calculations involving the 4 operations <br> - solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why <br> - solve problems involving addition, subtraction, multiplication and division <br> - use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy |

Fractions, decimals and percentages
count up and down in tenths; recognise that parts and in dividing one-digit numbers or quantities by 10

- recognise, find and write fractions of a discrete set of objects: unit fractions and non-un
fractions with small denominators
recognise and use fractions as numbers: unit fractions and non-unit fractions with small fractions and no
denominators
- recognise and show, using diagrams, equivalent fractions with small denominators
add and subtract fractions with the denominator within one whole [for example, $5 / 7+$ $1 / 7=6 / 7]$
- compare and order unit fractions, and fractions with the same denominators
- solve problems that involve all of the above.

Properties of shape

- draw 2-D shapes and make 3-D shapes using modeling materials; recognise 3-D shap
- recognise angles as a property of shape or
description of a turn
- identify right angles, recognise that two right angles make a half-turn, three make three identify whether angles are greater than or less than a right angle
- identify horizontal and vertical lines and pairs of perpendicular and parallel lines

Recognise and show, using diagrams, families of ommon equivalent fractions
Count up and down in hundredths; recognise that hundredths arise when dividing an object by 100 and dividing tenths by 10

- Solve problems involving increasingly harder tractions to calculate quantities, and fractions to
divide quantities, including non-unit fractions divide quantities, incluaing non-unit frac
- Add and subtract fractions with the same denominator
- Recognise and write decimal equivalents to $1 / 4,1 / 2$
- Find the effect of dividing a one or two digit number by 10 and 100 , identifying the value of the digits in the answer as ones, tenths and hundredths
- Round decimals with one decimal place to the nearest whole number

Compare numbers with the same number of decimal places up to two decimal places (including units of metric measure)

- Solve simple measure and money problems places
- Compare and order fractions whose denominators are all multiples of the same
Identify, name and write equivalent fractions of a given fraction
- Recognised mixed numbers and improper
fractions, and convert between these
Add and subtract fractions with the same
denominator, and denominators that are denominator, and denominator
multiples of the same number
- Multiply proper fractions and mixed numbers by whole numbers
- Read and write decimal numbers as fractions - Recognise and use thousandths - relating them to tenths, hundredths and decimal equivalents - Round decimals with two decimal places to the - nearest whole number and to one decimal place
- Read, write, order and compare numbers with up to three decimal places
- Multiply and divide decimal numbers by 10,100 and 1000
- Recognise the per cent symbol (\%) and understand that per cent relates to parts of 100 and write percentages as a fraction with
denominator 100 , and as a decimal
Solve problems which require knowing percentage and decimal equivalents of $1 / 2,1 / 4$, $1 / 5,2 / 5,4 / 5$, and those fractions with a
denominator of a multiple of 10 or 25
- Identify 3D shapes from 2D representations
- Know angles are measured in degrees: estimate
- Know angles are measured in degrees: estima
- Draw given angles and measure them in degrees
- Identify: angles at a point and one whole turn, angles at a point on a straigh ine, other
multiples of 90 degrees
- Use the properties of rectangles to deduce related
angles polygonsh between regular and irregular and angles
use common factors to simplify fractions; us common multiples to express fractions in the same denomination
$\rightarrow 1$ compare and order fractions, including fractions
- $\quad$ add
- add and subtract fractions with different denominators and mixed numbers, using the
concept of equivalent fractions
multitly simple pairs of proper fractions, writing
the answer in its simplest form [for example, $1 / 4$ the answer in its simplest form [for example,
$\times 1 / 2=1 / 8$ ]
- divide proper fractions by whole numbers [for example, $1 / 3 \div 2=1 / 6$ ]
associate a fraction with division and calculate decimal fraction equivalents [for example,
for a simple fraction [for example, $3 / 8$ ]
- identify the value of each digit in numbers given to 3 decimal places and multiply and divide to 3 decimal places
- multiply one-digit numbers with up to 2 decimal
- places by whole numbers
- use witt divisin method inces wer answer has up to 2 decimal places
answer has up to 2 decimal places .
rounded to specified degrees of accuracy
recall and use equivalences between simple fractions, decimals and percentages, including in different contexts
- draw 2-D shapes using given dimensions and angles
- recognise, describe and build simple 3-D shapes, compare and classify their properties and sizes and find unknown angles in any trian
regular polygons
- illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
- recognise angles where they meet at a point, are find missing angles

| Position and direction |  | - describe positions on a 2-D grid as coordinates in <br> the first quadrant <br> - describe movements between positions as translations of a given unit to the left/right and up/down <br> - plot specified points and draw sides to complete a given polygon. | - identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed. | - describe positions on the full coordinate grid (all <br> four quadrants) <br> - draw and translate simple shapes on the coordinate plane, and reflect them in the axes. |
| :---: | :---: | :---: | :---: | :---: |
| Measure | - measure, compare, add and subtract: lengths ( $\mathrm{m} / \mathrm{cm} / \mathrm{mm}$ ); mass ( $\mathrm{kg} / \mathrm{g}$ ); volume/capacity ( $1 / \mathrm{ml}$ ) | - Convert between different units of measure [for <br> example, kilometre to metre; hour to minute] <br> - measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres <br> - tind the area of rectilinear shapes by counting squares | - convert between different units of metric measure (for example, kilometre and m centimetre and metre; centimetre and centimetre and metre; centimetre and milimetre; gram and kilogram; litre and millilitre) <br> - understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres <br> - calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm2) and square metres ( m 2 ) and estimate the area of irregular shapes <br> - estimate volume for example, using 1 cm 3 blocks to build cuboids (including cubes)] and <br> - uspacity for example, using water] involving measure ffor example, length, mass, volume, money] using decimal notation, including scaling. | - solve problems involving the calculation and conversion of units of measure, using decim notation appropriate <br> - use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places <br> - convert between miles and kilometres <br> have different perimeters and vice versa <br> - recognise when it is possible to use formulae for <br> area and volume of shapes <br> - calculate the area of parallelograms and <br> - triangles <br> - calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm3) and cubic metres (m3), and extending to other units for example, $m \mathrm{~m} 3$ and km 3 ]. |
| Time | - tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24 -hour clocks <br> - estimate and read time with increasing accuracy to the nearest minute; record and compare time in erms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight <br> - know the number of seconds in a minute and the <br> number of days in each month, year and leap year <br> - compare durations of events [for example to calculate the time taken by particular events or tasks]. | - read, write and convert time between analogue and digital 12- and 24-hour clocks <br> - solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days. | - solve problems involving converting between units of time |  |
| Money | - Add and subtract money to give change ( $£$ and p) in practical contexts | - estimate, compare and calculate different measures, including money in pounds and pence |  |  |
| Algebra |  |  |  | - use simple formulae <br> - generate and describe linear number sequences <br> - express missing number problems algebraically <br> - find pairs of numbers that satisty an equation <br> - with 2 unknowns <br> - enumerate possibilities of combinations of 2 variables |

| Ratio |  |  |  | - solve problems involving the relative sizes of 2 quantities where missing values can be found by using integer multiplication and division facts <br> - solve problems involving the calculation of percentages [for example, of measures and such as $15 \%$ of 360 ] and the use of percentages for comparison <br> - solve problems involving similar shapes where the scale factor is known or can be found <br> - solve problems involving unequal sharing and grouping using knowledge of fractions and multiples |
| :---: | :---: | :---: | :---: | :---: |
| Statistics | - Interpret and present data using bar charts, <br> pictograms and tables <br> - Solve one-step and two-step questions using information presented in scaled bar charts, pictograms and tables | - Interpret and present discrete and continuous data using appropriate graphical methods, including bar charts <br> - Solve comparison, sum and difference problems using information presented in bar charts, pictograms and tables | - Solve comparison, sum and difference problems <br> using information presented in a line graph <br> - Complete, read and interpret information in tables, including timetables | - interpret and construct pie charts and line graphs and use these to solve problems <br> - calculate and interpret the mean as an average |
